

Donn Grid Systems

Health and Safety Data Sheet

Identification:

Product: Ceiling and components

Product Purpose: Suspended Ceiling Systems

Description:

A suspended ceiling grid system comprising roll formed steel or aluminium components suspended below a structural floor or roof to support infill panels and provide a flat or sloping soffit, with a primary function to improve the appearance of a ceiling area by concealing or integrating other services.

Component parts:

Combinations of:

- * Hot Dipped Galvanised Steel
- * Polyester Painted Steel
- * Polyester Painted Aluminium

Hazards:

None under normal usage when manufacturers instructions are followed. Products are non caustic, non toxic, non corrosive and non flammable.

Personal Protection:

Inhalation: Appropriate respiratory protection should be worn when drilling, cutting, welding or brazing, or if sanding product.

Eyes: Wear protective gloves and clothing to prevent injury when cutting product or pack strapping. If hands are sensitive to mineral oils, gloves and a suitable barrier cream should be worn.

Ingestion: No hazard under normal use.

Please refer to 'The Personal Protective Equipment Regulations 1992' for guidance.

Emergency Procedures:

Eye Contact: Irrigate eyes with clean water or suitable eye wash. If symptoms persist, seek medical attention immediately.

Skin Contact: Wash affected area carefully with clean water and a recommended skin cleaner, taking care to remove foreign bodies. If after drying, symptoms persist, seek medical attention immediately.

Unloading, storage and manual handling:

Unload using a suitable fork lift truck

Store in dry conditions

Handling, please refer to 'The Manual Handling Operations Regulations 1992' for guidance.

Waste Disposal

Commercial Scrap

Remove to a designated building products tip or authorised landfill site.

Keep out of reach of children.
